# About the course Artificial intelligence essentials

### Course Presenter : Zach Star

Artificial intelligence, in this course we explore the fascinating world of intelligent machines. In this course, we will learn about the foundations of artificial intelligence, including how machines simulate human intelligence using algorithms and data. Weâ€™ll cover key concepts such as machine learning, neural networks, natural language processing, and computer vision. You will understand how AI models are trained, evaluated, and deployed in real-world scenarios. From smart assistants to autonomous cars, this course provides insights into how AI is revolutionizing industries. We will also examine ethical considerations and the future of AI. By the end of the course, youâ€™ll gain the knowledge and practical skills needed to build AI-driven applications, understand AI decision-making, and appreciate the potential and limitations of this technology. Start your journey into the future of innovation with the Artificial Intelligence Course and discover how machines are reshaping the way we live and work. Zach Star

**Artificial Intelligence Category's Courses**

# Course Lesson(6)

Lesson 1 : **Renewable Energy Research and Which Majors to Pick**

Lesson 2 : **Computer Science Careers and Subfields**

Lesson 3 : **Artificial Intelligence Research and Which Majors to Pick**

Lesson 4 : **Artificial Intelligence Part 2 Research and Companies**

Lesson 5 : **Automotive Engineering Careers and Where to Begin**

Lesson 6 : **Nanotechnology Research Examples and How to Get Into the Field**
