About the course ChatGPT aPI for beginners

Course Presenter : Liam Ottley

ChatGPT aPI, in this course we will learn how to use the ChatGPT API provided by OpenAI to build intelligent, interactive tools. Youâ€™ll begin by understanding how the API works, how to obtain your API key, and how to send requests and receive responses using Python or JavaScript. Weâ€™ll explore practical projects like creating a chatbot, automating text generation, and customizing the AI's behavior using parameters like temperature, max tokens, and system prompts. Whether youâ€™re a beginner or a developer new to AI, this course provides step-by-step instructions, real code examples, and best practices for working with the ChatGPT API. Youâ€™ll also learn how to manage usage, monitor costs, and secure your API key. By the end of the course, you'll be able to confidently build your own smart applications using ChatGPT. Liam Ottley

Artificial Intelligence Category's Courses

Course Lesson(13)

Lesson 1 : **Master Prompt Engineering Full Guide**

Lesson 2 : **5 Step AI Crash Course for Entrepreneurs 12 Months in 12 Minutes**

Lesson 3 : **How to Fine Tune GPT3 Beginner s Guide to Building Businesses w GPT 3**
