INTRODUCTION

ABOUT US

- Looking for a doorm that will not only give you the perfect room but also offer you services that will allow you to focus only on having the perfect experience abroad? Then welcome to DOORM.

- DOORM student housing was created so that the only thing you have to worry about once you get to Portugal is your workload.

- Located in the heart of Lisbon, our student housing offers you nothing but the best accommodations and services, that allows you to grow and experience everything you can from your semester abroad.

- Open 24/7, with security and onsite staff always present, you will encounter perks like a gym, high speed WiFi, laundry and housekeeping services, fully equipped state of the art kitchens, a study room with computers, printers, games and living areas that will allow you to feel like you're at home the second you arrive in Portugal.

- However we know that finding the right place is not the only thing you´re looking for. With that in mind, we made sure we can guide you through your experience in Portugal by helping you figure out where to send your postcards from, which carrier to use and where to find a doctor to look at that rash. At DOORM we are here to help you work everything out.

- We have been where you are now and have anticipated all your needs and we want to make sure that we have the answers for your questions. We are more than just a room, we’re your home away from home.

- Focus only on having the experience of a lifetime.

STUDENT RESIDENCES MARKET

student housing

THE LISBON / PORTUGUESE STUDENT MARKET

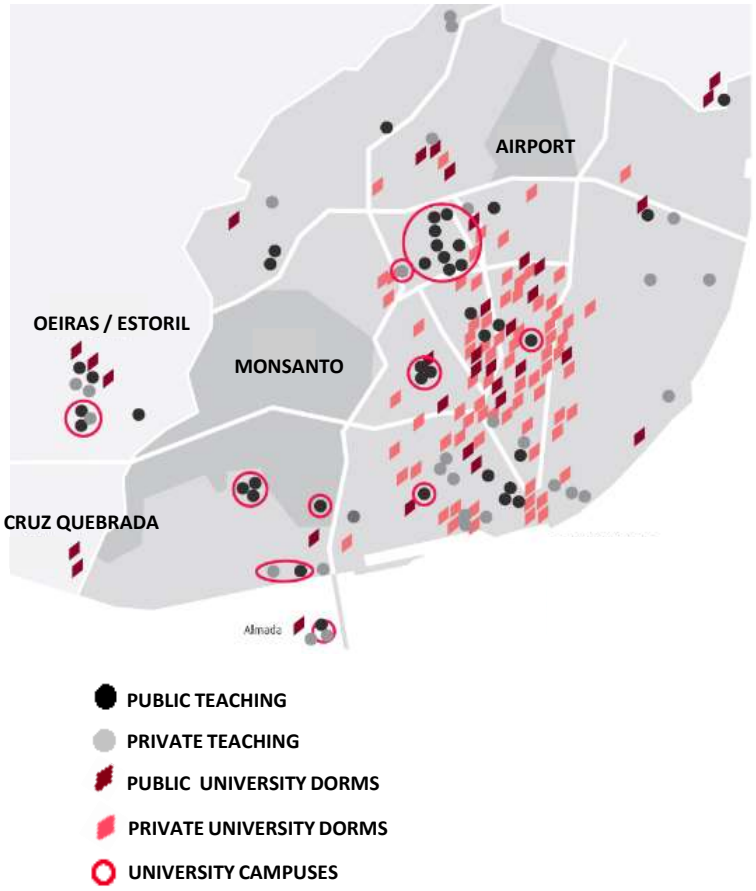

- One aspect that characterizes the city of Lisbon is the fact that it is one of the most important university cities of Europe, a city of knowledge, multicultural, trendy, safe, innovative and creative.
- Undoubtedly, the biggest university and national research pole, with a population of more than **140,000 students** enrolled in its universities and over 16,000 researchers working in various areas, particularly in the context of Business Sciences, the Engineering, Information Technologies and Communication, Social Sciences and Health, among many others.
- Lisbon annually receives more than **4,000 foreign students,** from many different countries making Lisbon a true ecosystem of multicultural knowledge. They are attracted by the modern image of the city, for its innovative profile and city entrepreneurial environment, making the capital one of the best cities in Europe to study.
- This reality reflects an exponential growth of the university population in Portugal and Lisbon in particular.
- Portugal went from a small universe of 20,000 students in the 60, to more than 403,000 in school year 2010/2011.
- The number of foreign students studying in Portugal has increased considerably, tripling in a decade, from about 2,560 in the academic year 2000/2001 to 7,385 in 2009/2010, and in two years, between 2010/2011 and 2011/2012, there was a new increase by 1812 foreign students only in the framework of the Erasmus program.
- In the 100 European universities more sought by students interested in an international experience, the Tecnhical University in Lisbon figured in the 26th place.
- This growth dynamic has justified the growing interest in the university residence market, which sees it as an excellent business opportunity.
- Focusing the analysis on the Lisbon market, on the supply side, the city offers a range of accommodation for
- quite diverse students and is based in the university residences exploited by social services in the institutions, in homes, private universities (operated by private), fundamentally an offer strongly multifaceted by rooms and apartments leased by the owners, often illegally.
- However, most of this offer accommodation for students is still unapologetically informal and unstructured, and in recent years new players have appeared on the market with better solutions adapted to the market requirements.

STUDENT RESIDENCES MARKET

THE INSTALLED OFFER - STUDENT RESIDENCES

- An analysis of the housing market universe to students, focusing only on areas that allow the permanence of
- students for a predetermined period of time, also offered a
- range of other complementary services, and under professional management -
- halls of residence (whether public or private).

- Thus, in line with the study carried out by Worx - Real Estate Consultants, called WStudent Housing Review 2013 were identified in Lisbon a total of 140 accommodations that had a residence Profile, corresponding to a universe of approximately 4,000 beds available (see Infographics).
- As it turns out, these units are located preferably near university poles, and it was found that 19 homes (more than 13% of supply) are located in Alvalade, finding the remaining supply mostly concentrated in the New Avenues area and *Marquês de Pombal* , *Avenida da Liberdade* and *Arroios / Alameda*.
- It should be noted that in recent years there has been some dispersion of supply in university housing, emerging new
- units in areas such as *Estefania*, *Saldanha* and *Campo Martires da Pátria*.

DOORM STUDENT HOUSING - CONCEPT

MAKING SURE YOU FEEL AT HOME. THE COMMON ROOMS

- Common room with pool table and table tennis.
- Screening room with weekly film nights and outdoor cinema.
- **Study spaces** with computers, printing and photocopying services available at reasonable fees.
- Lounging area so you can simply hang out with your **friends** or meet new people.

FRIENDLY STAFF YOU CAN COUNT ON, EVERY DAY, ALL THE TIME

- A reception and customer services team that help you deal with all of life's questions and more.
- Laundry, **housekeeping** and building maintenance staff ready to solve any issues you may have.
- A virtual helpdesk where you can ask for help or just check on the latest activities happening at **DOORM**. From cultural outings, to cooking classes find out what's the buzz at DOORM.

A 24/7 SECURITY TEAM THAT GUARDS WHAT IS MOST IMPORTANT: YOU

- Onsite **24 hours, 7 days a week** professionally trained security staff.
- CCTV monitoring.
- Swipe-card entry system.

DOORM STUDENT HOUSING - CONCEPT

KITCHEN AND DINING AREAS WHERE EVERY MEAL IS AS FULFILLING AS THE LAST

- A place to **enjoy** a wide variety of snacks, sandwiches, full course-meals, coffee and drinks.
- Fully equipped kitchen where your can free your inner chef or master your culinary skills.
- Your own locked pantry space.

HOUSEKEEPING

- Your Mom's cleaning without bringing her along with you. We make sure your **DOORM** room is **impeccable**, every single week. Rain or shine.
- Weekly cleaning and linen change.

LAUNDRY ROOM AND MUCH MORE

- On-site laundry facilities containing washers, dryers, iron and ironing table.
- Dry cleaning and laundry services available at reasonable prices.

DOORM STUDENT HOUSING - CONCEPT

FULLY EQUIPPED GYM

- Open 24/7 and with free access to all residents.
- Includes the latest **technology** fitness equipment.

COURTYARDS

- Courtyards are fitted with outdoor furniture and offer a relaxing environment to study on those **sunny days** which are quite a few in Lisbon!
- Garden area and basketball backboard area.

TACKLE KNOWLEDGE WITH FREE ULTRA SPEED WIFI

- Up to 100mb WiFi available in every room and in every common area throughout the DOORM building.

DOORM STUDENT HOUSING - CONCEPT

VENDING MACHINES & RECEPTION

- Vending machines are available within the building, to fullfill all your cravings at whatever time you have them.
- The reception will also sell additional items in order to make your life as accessible as possible.

STORAGE

- Didn’t pack light? We have storage available on a first come-first served basis for a reasonable monthly fee.

DOORM SANTOS – THE 1st BUILDING

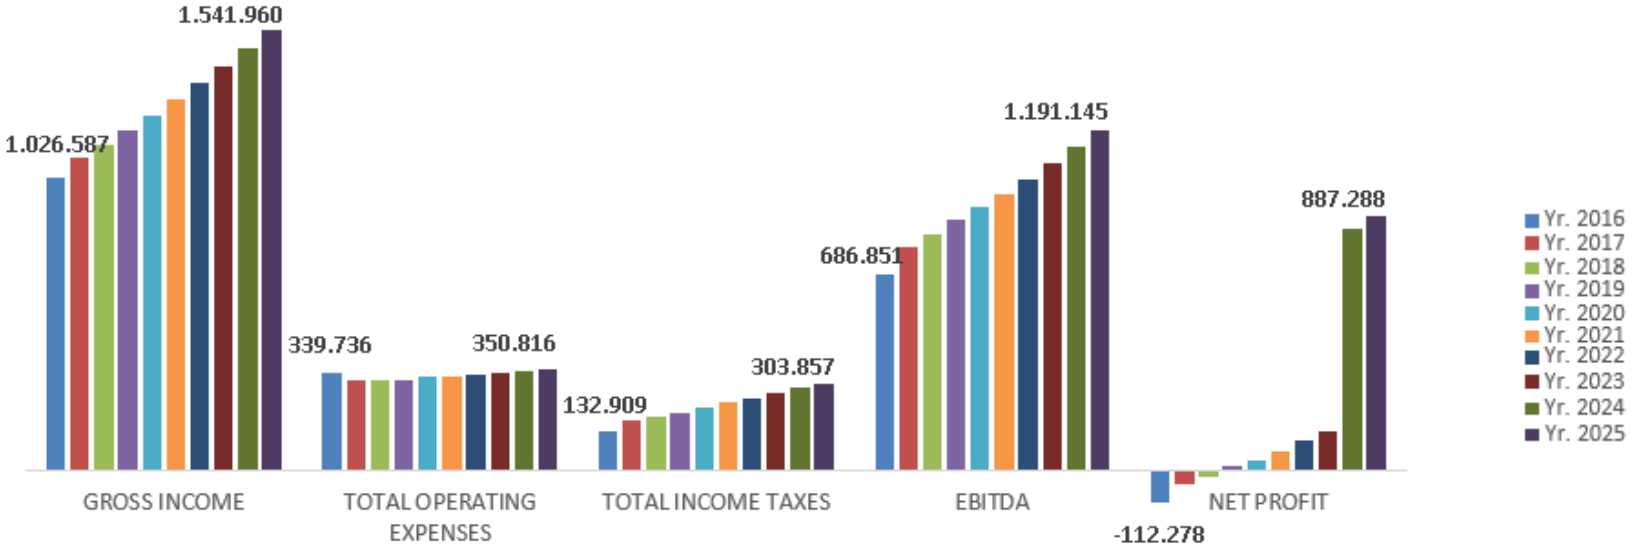

QUALITY, DIFFERENTIATION AND PROJECT INTEGRATION

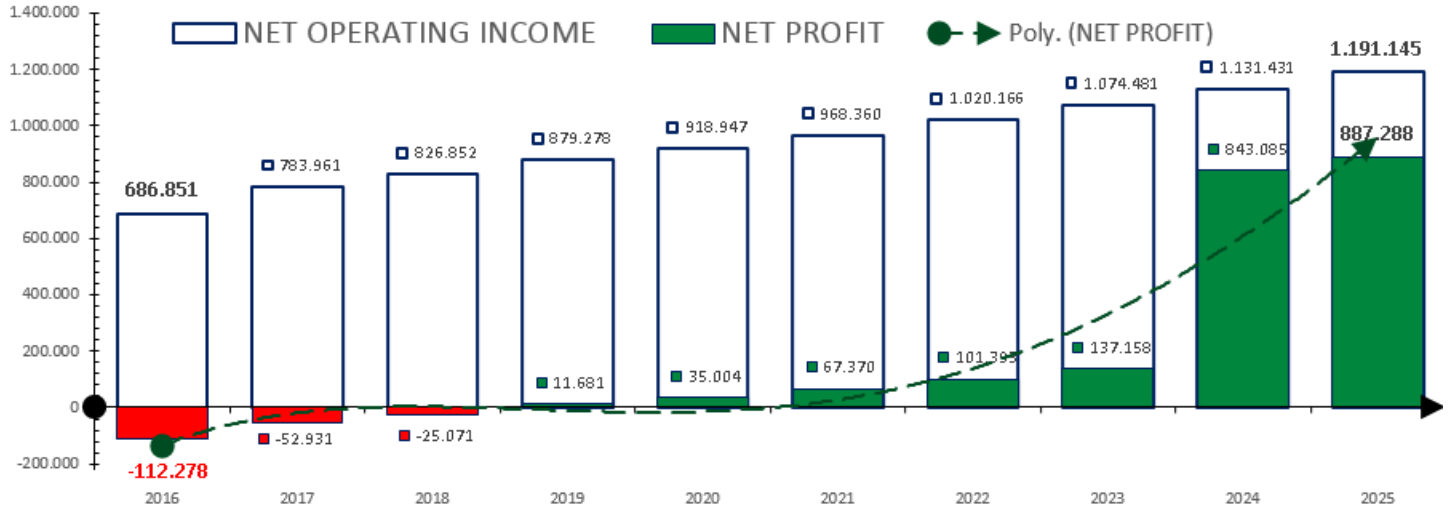

- The building, already in activity, has 66 apartment units with a total of 91 beds and is located in Santos, known as a very trendy place to b in Lisbon.
- It will be capable of attracting students and teachers who desire the best place to be.
- This building will have three major stream revenues:
  - Residential Students and Professors
  - Short Rental
  - Several Extra Services capable of easying the custumer´s life
- This will be the place where all concepts and improvements will be thoroughly tested and replicated to the other units.
- The building is 2 minutes away from IADE, Lisbon´s Design, Publicity, and Marketing Univerty.

DOORM SANTOS – THE 1st BUILDING

OPERATING INCOME – CASH-FLOW GENERATED

The Doorm in Santos is already in operation, consisting of 10 months (83%) allocated to Student Residence and 2 months (17%) to Short Rental with 97% of residential occupancy and 60% of Short Rental (assumed).

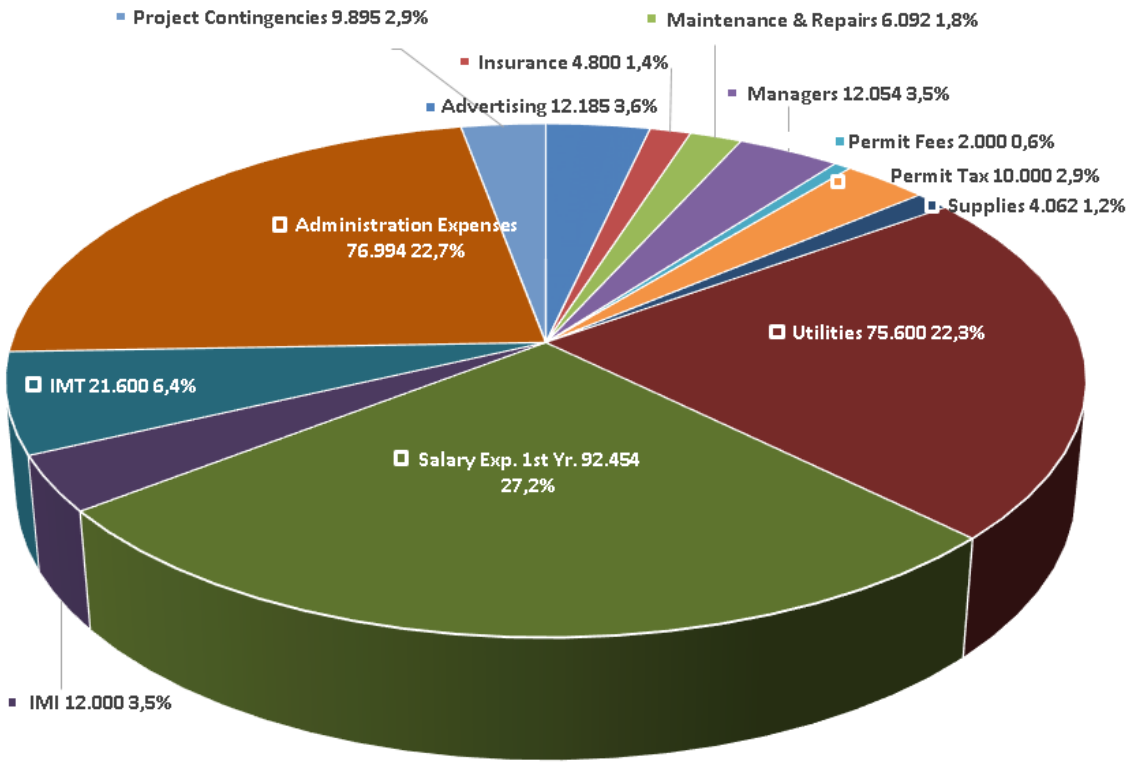

DOORM SANTOS – THE 1st BUILDING

OPERATING EXPENSES – THIS DOORM IS ALREADY OPEN

DOORM VS COMPETITION

BENCHMARK – UNIVERSITY RESIDENCES

- The promoter conducted a benchmark analysis comprising a sample which is considered representative of the supply of student residences operating in Lisbon.
- 8 student residences have been identified, with distinct management profiles, in particular 4 under private management and 4 under public management (in charge of University Social Services).
- While offering many points in common, we point out the fact that the survey (November 2013) verified an occupancy rate range located between 97% and 100%.
- The sample residences are:
    1. THE WINDSOR PALACE University Residence - Erasmus Palace Lisbon
    2. GRIMALDI PALACE University Residence - Erasmus Palace Lisbon
    3. SAVOY PALACE University Residence - Erasmus Palace Lisbon
    4. ZONESPRU University Residence - SPRU
    5. ANTÓNIO ALEIXO University Residence - SAS4 University of Lisbon
    6. ARTILHARIA UM University Residence - SAS University of Lisbon
    7. LUMIAR University Residence - SAS University of Lisbon
    8. TOMÁS RIBEIRO University Residence - SAS University of Lisbon

DOORM VS COMPETITION

BENCHMARK – UNIVERSITY RESIDENCES

The analysis performed to this sample has established that:

- All of the student accommodation units offer a set of common spaces including living rooms, kitchens and shared sanitary facilities;
- In units run by universities there is a higher appetite for the provision of other spaces, including study rooms and libraries;
- In general, all kitchens are shared and fully equipped with one exception: no dishwasher;
- Only two of the units feature a formatted space just for meals;
- Three units (all managed by private) are shown as "smokers friendly";
- All analyzed devices provide Internet (Wireless), and in most cases these costs are included in the price of monthly rental;
- Sanitary facilities are usually shared and only one unit offers rooms with private bathrooms;
- As part of the services provided all units offer cleaning services of the common areas, but with distinct cadences (once a week or daily);
- Regarding private spaces (rooms), weekly free cleaning services are provided in 5 of the 8 analyzed units;
- Treatment services also exist for the units under management by Universities or University Residence ZoneSpru bedding.

DOORM VS COMPETITION

BENCHMARK – UNIVERSITY RESIDENCES

Regarding the infrastructure it was found that all the units in the sample universe are well located, particularly in view of the access to public transportation (bus, train, metro) and the other essential services such as grocery stores or convenience stores.

This benchmark has noticed that the spaces indoor / outdoor presented themselves in general good care, particularly in older buildings. It should be noted, however, that with regard to furnishings, and fundamentally in homes under public management, it was found that although well maintained, they need a qualitative upgrade, as they are outdated, old-fashioned, not following these spaces currently trends, which must include contemporary furnishings, functional, trendy, cheerful, bright and comfortable spaces.

It was found that rooms, generally, are is too similar in the incorporated level of equipment, namely bed, bedside table, desk, chair and wardrobe. Regarding areas, they varied between too tight rooms (8 sqm) to other quite spacious (24 sqm).

This sample identified the predominance of single / individual rooms in units under private management and prevalence of doubles in the case of units under University management

It should be noted that this trend is in line with the conclusions of the WStudent Housing Review 2013 study.

This study concluded, that in existing university residences (Lisbon), there is a clear predominance of single rooms, representing more than half this market.

The study also identified that residences under private management are clearly betting on social networks and in specific channels of student accommodation promotion.

Almost all of the sample units suffer the seasonality effect associated with student mobility, that is, the months of July and August translate low occupancy rates, which are more visible in units under management of the SAS from these universities.

In private residences in order to optimize operation costs and income in those months, room / night rental for tourists is used.

DOORM PIPELINE

THE NEXT PROJECTS

We have already identified several properties which aggregate the features required.

Of these assets we present and have thoroughly studied five, one of these is already built and in full operation, which is the DOORM in Santos.

These are typically properties in need of renewal, thus implying construction works of some kind, as stated in the column "Construction Value".

The value of the Santos Doorm has be negotiated.

The Santos Doorm is already in full operation

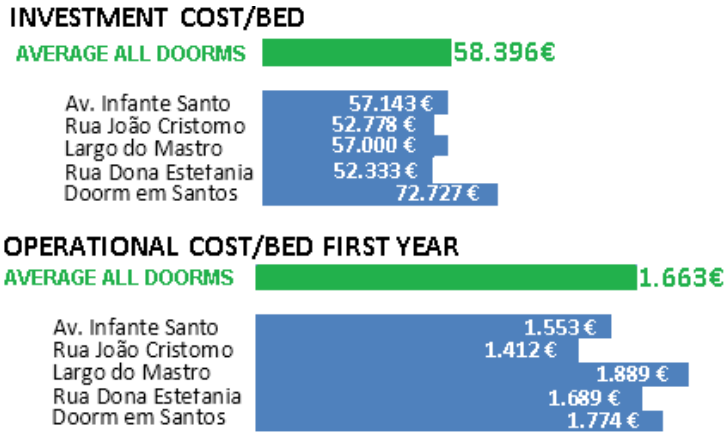

DOORM PIPELINE 2016

CONSIDERED SCENARIOS

Various scenarios for Residential and Short Rental allocation and occupancy were considered.

Occupancy and the weight of Residential Student versus Short Rental in the Doorms influence greatly the diversified streams of revenue.

Afterwards several scenarios of occupancy and allocation of Student Residence versus Short Rental will be presented, thus preparing us for a better approach to the market.

Nevertheless we consider that in the long run the demand for Student Residences will increase as has been the case in the last years.

Scenario Type	Residential Students		Short Rental	
	Allocation	Occuppancy	Allocation	Occuppancy

SCENARIO H – FINANCIAL INDICATORS

FINANCIAL INDICATORS - SUMMARY

2016 - 2025

PAYBACK PERIOD	**MORE THAN 10 YEARS**	
FUTURE PROPERTY VALUE		
HIPOTESIS A)	**37.480.000 €**	
HIPOTESIS B)	**38.619.701 €**	
HIPOTESIS C)	**44.792.069 €**	
HIPOTESIS D)	**0 €**	
NPV - NET PRESENT VALUE	**(NPV>0)**	
HIPOTESIS A)	**2.480.684 €**	ACCEPT PROJECT
HIPOTESIS B)	**3.620.386 €**	ACCEPT PROJECT
HIPOTESIS C)	**9.792.754 €**	ACCEPT PROJECT
HIPOTESIS D)	**-34.999.316 €**	REJECT PROJECT
XIRR - INT RATE RETURN	**0,00%**	
PROFIT	**-36.188.332 €**	
EQUITY x	**0,06**	For each 1€ invested, get 0,06€
ROI / PI - PROFITABILITY INDEX	**0,48**	BUSINESS NOT PROFITABLE!!!
BENEFIT COST RATIO = (I + NPV) / I		
FOR UNLEVERED CASH-FLOWS	**112%**	
FOR LEVERED CASH-FLOWS	**7%**	

REMARKS:

A) CONSIDERING THE FUTURE PROPERTY VALUE = PRESENT [€]

B) CONSIDERING THE FUTURE PROPERTY VALUE WITHOUT APPRECIATION [€]

C) CONSIDERING THE FUTURE PROPERTY VALUE WITH APPRECIATION [€]

D) EXCLUDING THE FUTURE PROPERTY VALUE

Period of 10 years. Inflation = 0,3%.

Period of 10 years. Escalation Rate = 2%.

ROI > 1 => BUSINESS PROFITABLE (ACCEPT) ; ROI = 1 => BREAK EVEN (INDIFERENT)

ROI < 1 => BUSINESS NOT PROFITABLE (REJECT)

PERIOD	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	TOTAL

PHASES OF AQUIRING, DEVELOPING AND MANAGING THE DOORM PIPELINE

- **1. IDENTIFYING AND PROPERTIES NEGOTIATING**
- **2. ADVISORY, PROCUREMENT, COORDINATION AND PROJECT MANAGEMENT**
- **3. COORDINATION AND MANAGEMENT OF ALL BUILT DOORMs**

BUSINESS PROPOSITION

student housing

PHASES OF AQUIRING, DEVELOPING AND MANAGING THE DOORM PIPELINE

1. IDENTIFYING AND PROPERTIES NEGOTIATING | 6% OF EACH PROPERTY NEGOTIATED |

For identifying and advice for negotiating suitable properties to this project, and considering the size of the project (Up to 631 Beds in 3 years), a minimum charge of 6% (+ VAT) of the business will be appropriate.

By business we can understand from the following variants:

a) Sale value of the land or units;

b) Investment Value in the project;

c) Capital increase of the fund;

d) Credit Value granted by the prosecutor in the background.

2. ADVISORY, PROCUREMENT, COORDINATION AND PROJECT MANAGEMENT | 5% OF TOTAL INVESTMENT |

Typically, this is to be calculated as 5% of the total investment (Property + Construction) in each property. This phase is to be paid when each property is closed.

This kind of project includes essentially the following types of challenges for advisors:

Assist in the selection of service providers (architects, engineering, project and quality managers , lawyers, tax specialists, design, marketing and communication agency, etc.);

Resource Coordination;

Project implementation;

Licensing phase.

BUSINESS PROPOSITION

PHASES OF AQUIRING, DEVELOPING AND MANAGING THE DOORM PIPELINE

3. COORDINATION AND MANAGEMENT OF ALL BUILT DOORMs

Monitoring the DOORMS operation and ensure the operation is within the expectations of the investor(s).

Typically, this is to be calculated as 7,5% of the Gross Income in each property. This phase is to be paid monthly upon each operation start.

This phase includes the operation management, coordination, marketing and brand awareness:

In essence, it is developed in three phases:

a) Preparation of the marketing and communication plan, selection and procurement of DOORM partners;

b) Promotion and implementation of bed sales and business;

c) Follow-up and management:

1) Contracts with all the entities, namely Energy, Water, TV, Internet, Cleanning, Human Resources.

In cases a) and b) cost values for each year were included in the project assumptions.

To finance a), a preliminary budget, is normally approved and funded by the investor.

C. 1) is included in the operations costs.

NEXT-STEPS & TIME-LINE
